Four years of experience have broadened my horizons, inspired my life and prepared me for a career in science. I am pleased to meet many excellent students and professors of HKU, from whom I learned a lot. It is supported by the Faculty of Natural Sciences and offers various research opportunities. Research projects have brought me to the limit of science and developed my creative thinking. In addition to academics, I have benefited greatly from the whole person's education in HKU. The worldwide exchange program has allowed me to experience a different lifestyle in the United States. The residential life at Shun Hing College allowed me to make friends with students from different cultural backgrounds. I would like to thank all the friends and teachers I met during my university years. University.
